Instal·lació i configuració d'Adyen Platform amb Woocommerce

Creació i configuració de la plantilla de pagament (TEST)

Per a la instal·lació de la plataforma de pagament Adyen, primerament serà necessari que ens registrem al lloc web de la plataforma d'**Adyen** per a un compte tipus TEST. Aquest compte ens permetrà crear un usuari i una SKIN configurable que serà utilitzada per la nostra plataforma¹. Així doncs, podrem fer testos de prova amb diferents targetes falses, per a veure'n el funcionament previ abans de fer el salt a la plataforma **LIVE**.

Mitjançant el plugin per a Wordpress: **Woocommerce Adyen Payment Gateway**, que integra la platforma d'Adyen amb el nostre *eCommerce*, podrem afegir aquest sistema de pagament a la nostra botiga virtual. Per tant, s'haurà d'adquirir i instal·lar a Wordpress amb el procediment habitual.

Un cop registrats, entrarem al panell d'administrador amb les nostres credencials².

TEST		
Please Sign In		Multi-currency reporting For point-of-sale merchants, we have introduced a new tool to switch between different currencies. You will find this, as well as a new summary for terminal types and versions, on the POS landing page.
Account		
User Name		
Password		
Password	Remember my account	

Entrarem i seleccionarem, en el panell esquerre, l'opció **SKINS > Create New Skin**. I emplenarem les dades per a una nova plantilla.

List New Ec	lit	Upload Publish	Test HMAC Test

Save Skin to Test						

Entrarem la descripció de la nostra plantilla i en generarem les claus **HMAC**. En un principi, només generarem les claus de la plataforma TEST. Aquesta clau serà introduïda en el plugin instal·lat al nostre plugin de Woocommerce (**Woocommerce > Configuración > Ir a Caja > Checkout Options > Adyen**)

GATEWAY TEST MODE	
ATTENTION: disable Adyen sandb	ox mode if you want go live with your store.
Adyen sandbox	Enable Adyen Sandbox?
HMAC Test Key	0
Guardar cambios	

Habilitarem l'opció **Enable Adyen Sandbox** i copiarem la clau HMAC generada en el nostre panell d'Adyen. Finalment, desarem els canvis.

En el panell d'Adyen, podrem realitzar testejos de la plataforma mitjançant la pestanya que trobarem a **Skins > Seleccionem la nostra skin > Tests**. En aquest apartat podrem fer proves amb idiomes, amb quantitats de preus establertes, targetes i filtrar-ne quines volem i quines no, establir codi de país per la plataforma de manera que detecti l'idioma en cada cas.

Conversió a la plataforma en viu (LIVE)

Un cop tenim preparada la versió en TEST i s'han fet les proves necessàries, juntament amb decidir el *look and feel* de la plantilla de pagament, afegit a la plataforma i instal·lat el plugin per a Woocommerce. El procediment en *LIVE* a Adyen passa per aportar un seguit de documents de la societat creditora. Per a aportar aquesta sèrie de documents, anirem a la pestanya **Application.** En aquesta pestanya ens guiarà durant el procés de validació d'aquests documents.

Un cop haguem fet tot aquest procés, un administrador es posarà en contacte amb nosaltres. Se'ns demanarà informació extra, a més a més, d'accedir al lloc web per a comprovar-ne el funcionament de la plataforma i revisar-ne la **política de privacitat** i els **termes i condicions**. Seguidament, haurem de signar un contracte on s'estableixen les regles d'utilització de la plataforma d'Adyen i enviar-lo.

Quan s'aprova el contracte, rebrem unes credencials noves per a entrar a la plataforma en format LIVE i ja podrem publicar la plantilla creada seleccionant **SKIN > Publish**.

List New	Edit Uplo	ad Publish	Test HMAC	Test						
Publish your Skin to the Live system here. If you are satisfied with the settings and look-and-fee of your Skin on the Test system, use the "Publish to Live" button to copy the Skin from the Test system to Live.										
N.B. Please make sure that you have set the Live HMAC in the "Edit" menu, otherwise your skin will not work on the Live system.
