BIBLIOMETRICS: developing a publications analysis tool

Contents

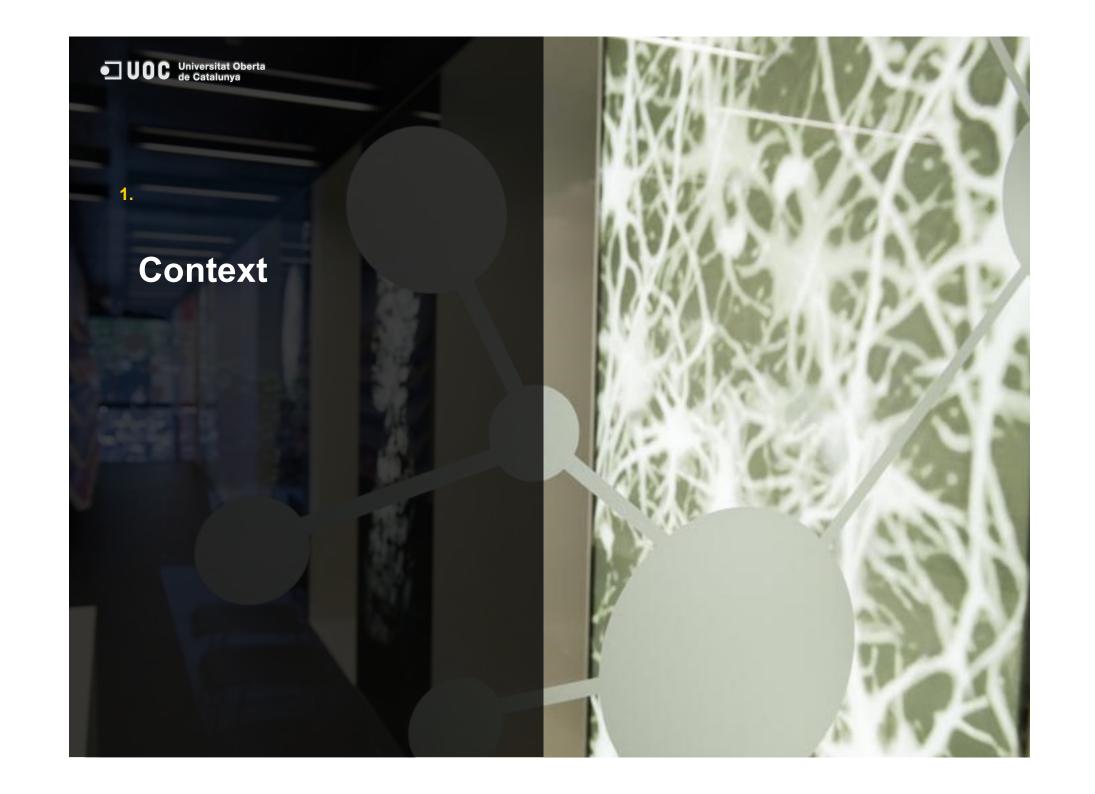

1. Context

- + Virtual Library
- + Library Services for Research
- + Bibliometric Services
- + UOC Research Areas
- + Bibliometric indicators by areas
- Bibliometric information sources
- Increase Bibliometric services

2. Bibliometrics

- + Project organization chart
- + Bibliometrics: what is it?
- + Bibliometrics: what does it offer?
- Indicators
- + Faceted search
- + Sources of bibliographic data
- Sources of bibliometric data
- + Technology

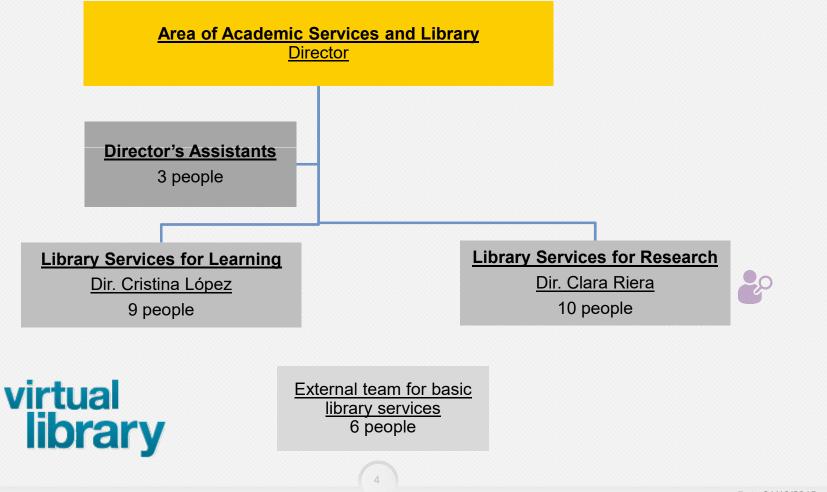

3. Future goals

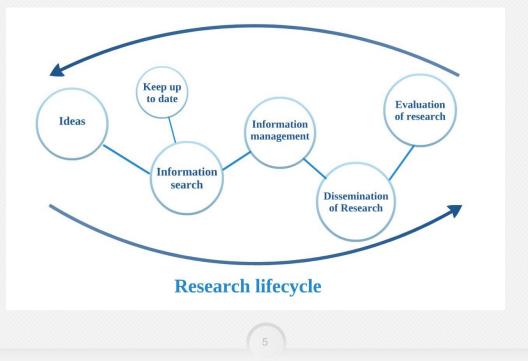

Library Services for Research

- Bibliografhic services
- Bibliometric services
- Standardization of author's names
- Support service for accreditation calls
- Open-access publication of Doctoral Theses

- CRIS data validation
- Predoctoral fellow training
- Editorial policies and Open Access
- UOC's academic journals management

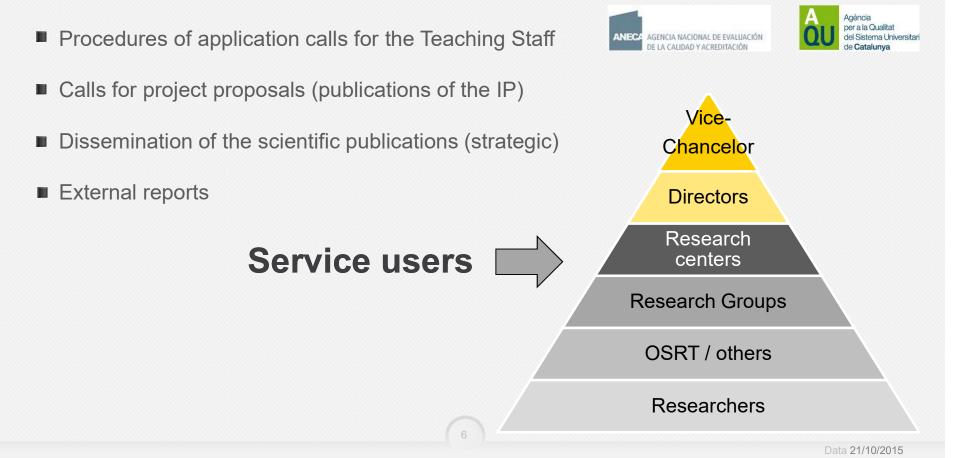

Bibliometric services

 Evaluation of scientific publications, at individual, research group, department, knowledge area or institutional level.

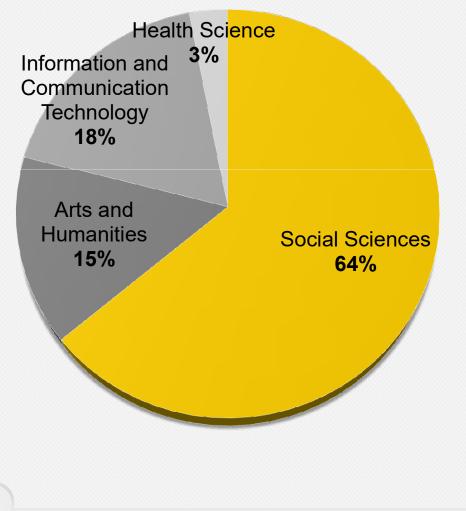

UOC Research Areas

Focus on:

- Education and ICT (e-learning)
- Information and Knowledge Society

The European Science Foundation (ESF) signed in January 2014 a memorandum of understanding with the Norwegian Social Science Data Services (NSD) to transfer the maintenance and operations of the European Reference Index for the Humanities (ERIH) to NSD. The ERIH database operated by NSD is called ERIH PLUS.

BIBLIOMETRICS: what is it?

- An in-house database
- Allows users to search and manage bibliometric data
- It stores the UOC's academic articles and lets users assess their quality based on national and international bibliometric indicators
- Responds to the bibliometric needs both of the faculty and researchers
- Restricted access for UOC community
- Types of documents: original, review, proceedings paper, editorial material, book review, letter.

BIBLIOMETRICS: what does it offer?

- Bibliographic and bibliometric information and normalized data
- Comparative bibliometric analysis of the UOC's researchers, research group, research centers and departments
- Data extraction in different formats for exporting (graphical, CSV, etc.)
- Graphical representation of data
- Four levels of indicators:
 - 1. Productivity
 - 2. Visibility
 - 3. Impact
 - 4. Collaboration

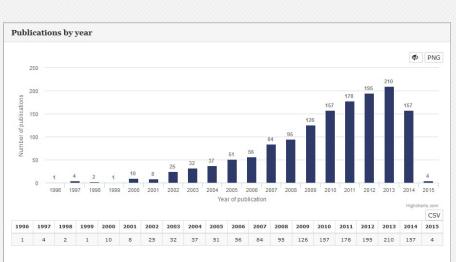

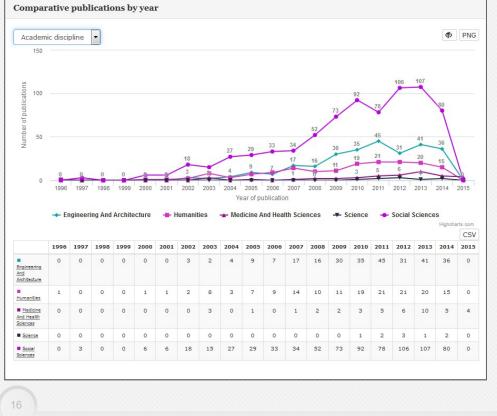

BIBLIOMETRICS: indicators

Productivity: number of publications by author, year of publication and type of publication, and the average number of publications by author, research group, research centre or department at the UOC.

BIBLIOMETRICS: indicators

Visibility: analysis of the quality of articles in terms of the journal they are published in using international and/or national bibliometric indicators.

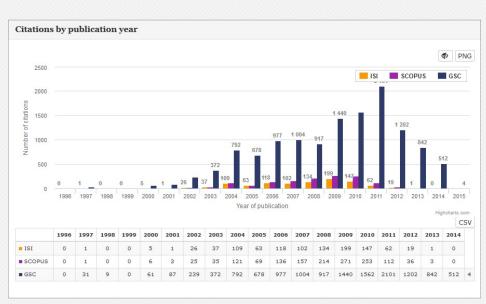

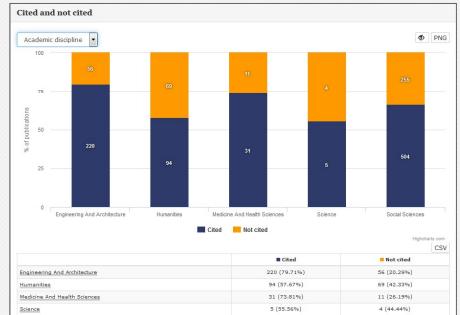

Social Sciences

BIBLIOMETRICS: indicators

Impact: analysis of the citations received by publication in ISI WoS, Scopus and Google Scholar databases.
