

VISIBILITY

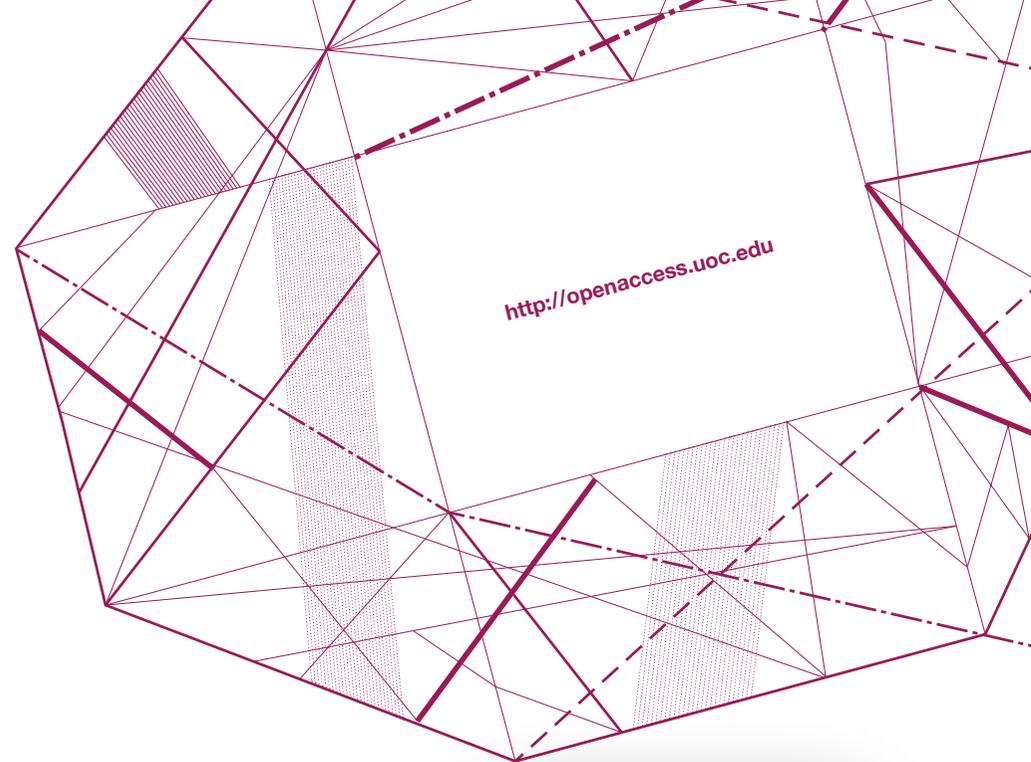

Depositing your documents in the O2 repository in open access (OA) increases visibility by ensuring more citations and greater impact than restricted-access or paper publications. Advantages of open access:

accessibility more downloads
competitive advantage
development cooperation
greater impact more visibility
more citations more readers
sustainability quicker access

Documents on the repository will also be found on other collective repositories, harvesters, search engines, etc.

OPEN ACCESS

The future Spanish Law on Science, Technology and Innovation will promote open-access publication of research backed by public funding, and its dissemination in open-access thematic and institutional repositories.

How many times is research paid for?

- » Universities pay staff to carry out research and cover the costs for equipment, materials, laboratories, etc.
- » Many scientific journals charge researchers for publishing the results of their research.
- » Funding bodies provide grants for research.
- » Libraries have to pay publishers relatively high prices to access the journals that researchers from their own universities publish in.

RESEARCH

What can be published?

Teaching and research staff can publish any kind of document generated as part of their research activities at the UOC:

articles research reports
papers reviews
book chapters talks
books working papers, etc.

UNPUBLISHED, PRE-PRINTS OR POST-PRINTS

TEACHING

What can you publish?

UOC teaching staff, depending on the agreements and needs of your respective study areas, can publish the following in O2:

lecture notes exercises
study guides CAT answers
continuous assessment tests (CAT)
validation tests exam answers
exam validation test answers
final degree projects, etc.

PUBLISH ON O2 IN FOUR STEPS

SERVICES FOR RESEARCH

GIR-O2

simply upload documents to GIR, the research assessment tool, and select self-archive to add them to the O2 repository

IMPACT

information on the SCOPUS impact factor, the IN-RECS/IN-REJS impact factor index for Spanish journals, and the MIAR (ICDS) journal citation index.
